[redacted] Nhi

Animal farm intern

I was raised in the countryside of Vietnam, where I developed a profound appreciation for agriculture and livestock farming. I am enthusiastic about the opportunity to enhance my expertise through an internship at your livestock farm in Denmark, concentrating on advanced techniques and management practices.

Work Experience

Family Cow & Swine Farm | [redacted] Vietnam Animal Husbandry Specialist | 2026 – Present

- Precision Nutrition: Managed daily feeding schedules tailored to specific growth stages to ensure optimal weight gain and health.
- Biosecurity & Hygiene: Implemented strict sanitation protocols, including regular chemical disinfection of pens to mitigate disease outbreaks.
- Breeding & Neonatal Care: Provided specialized assistance during sow farrowing and managed critical neonatal care for piglets to maximize survival rates.
- Workflow Optimization: Redesigned pen rotation schedules, which significantly improved the facility's workflow efficiency and hygiene standards.
- Facility Maintenance: Oversaw feed inventory and conducted routine maintenance on essential farm machinery and waste systems.

Education History

School of Medicine - Pharmacy & Technology | 2026 – 2028
Degree: Veterinary Medicine
