Livestock management

- Fed and care for livestock, ensuring its survival.
- Maintaining a clean and safe living environment for animals.
- Replaced animal's feed and water regularly
- Assisting breeding and birthing
- Assisting veterinary staff with animals.

PERSONAL EXPERIENCE HANDLING FARM ANIMALS

I've had hands-on experience with farm animals, especially poultry, and it's been both enjoyable and educational. Taking care of chickens involves regular tasks, like feeding them, making sure they have clean water, and cleaning their coop. I've learned that chickens thrive on routine, so I try to stick to a consistent schedule each day.

One of the most interesting parts has been egg collection. I check the nesting boxes twice a day—once in the morning and again in the afternoon or more than. At first, I had to get used to the idea of handling eggs carefully so they don't crack, but over time it became second nature. I learned that hens tend to lay in the same spots, so I know exactly where to look.

I've become familiar with their behaviors, like recognizing when one is broody or sick, which has helped me manage their well-being better.

Overall, working with poultry has taught me patience and responsibility, and it's fulfilling to see how well the animals thrive when given the proper care.

SKILLS

- Good customer service
- Good communication skills
- Team player
- Ability to adapt to organizational standards
- Animal and livestock care

HOBBIES

- Listening to music
