## Experience

“ Dairy Farming and Milk Production Management”

Description :-

Conducted a field-based study on dairy farm management practices, focusing on feeding, Breeding, healthcare, and housing systems. Assessed milk production efficiency and identified key factors affecting productivity in Small scale dairy farms. Gained hands on experience in animal husbandry, fodder planning and farm economics. Recommended cost effective strategies to improve milk yield and farm profitability.

Milking Operations :-

Milking Procedure, Operating and maintaining milking equipment. e.g., Parlor systems or bucket milkers, ensuring sanitary milking practices.

Calculating and preparing balanced feed rations, sourcing and storing feed hay, silage, grain. This all activities perform on my Dairy farm.
