ABOUT ME

My name is Dancun measuring 171CM, weighing 70kgs. I was born and raised by a simple family and our major source of income at home is farming. We literally sell farm produce such as soya bean, beans, maize grown on a medium scale. We have a number of dairy cows for milk production which generates a good return of income based on the readily available market around the city and local restaurants and cafes. Due to the lack of modernized machines and tools, we just sell fresh milk since we can not preserve it longer but even when it remains, it can be turned into skimmed milk. Growing up, I noticed that I could do a lot if I gained more knowledge and exposure about dairy farming.
